- 1.1.11. “DAO” shall refer to a decentralised autonomous organisation, sometimes called a decentralised autonomous corporation which is an organisation represented by rules encoded as a transparent computer program, controlled by the organisation members and not influenced by a central government.
- 1.1.12. “Digital Assets” refer to Digital Currencies, their derivatives, or other types of digitalised assets with a certain value.

- 1.1.15. “Dinox Services” shall mean various services provided to the Users by Dinox that are based on Internet and/or blockchain technologies and offered via Dinox websites, mobile applications, projects, and other forms (including new ones enabled by future technological development). Those Services include but are not limited to such Dinox ecosystem components, existing services offered, and novel services to be provided by Dinox, on display, depicted within, or otherwise viewable as NFTs.
- 1.1.16. “Dinox” shall mean a digital ecosystem comprising Dinox websites (whose

domain names include but are not limited to Dinox.io), mobile applications, applets and other applications that are developed to provide Dinox Services and includes independently operated platforms within the ecosystem.

- 1.1.17. “DNX” shall mean the NFT(s) project by Dinox available at Dinox.io. DNX is the first project of a broader company called Dinox. Dinox creates a fully-featured 3D engine (UNITY 3D). NFT holders will even be able to print their NFTs on home 3D printers, and Dinox can easily adapt game scenes to support VR/AR/XR. The Dinox NFT is at the centre of the entire game and the ecosystem. It can be purchased using DNXC, ETH, MATIC or BSC. The first generation of DNX (ERC-721) will be generated and released following the TGE. Most will go to DNX stakers, but some will go to the general marketplace to be purchased with DNXC or even ETH, MATIC or BSC. Additional DNX(s) will be added to the world as the game world grows. DNX is a standard ERC 721 token deployed and existing on the Ethereum mainnet. It’s extended with some basic features -> sales and breeding. This token is represented within the game as a fully animated and functioning unique “dinosaur”. DNX is a building block of the DinoX universe. We have prepared a custom complex solution for generating these creatures, complete with their attributes, colours, names, animations, etc. All of this was done months before the time of the first phases. All the DNX tokens begin as unhatched eggs. This way, all the collectors and non-players could use the NFT as an asset on its own and use it as a simple plain collectable, just like pokemon booster packs, as the content of the egg is hidden unless hatched by the owner. Similar to hatched DNX, unhatched eggs are all unique, and they have some corresponding traits/colours/patterns to the future dino that will hatch out of it. DNX dinos have some blockchain written traits and some centralised data tied to them. They have a family name (velociraptor, triceratops, etc.), a sizing indicator, rarity indicator, birthday, and many more game-related stats and traits.

- 1.1.18. “DNXC” shall mean a standard ERC20 token used for complete interaction with the DinoX app and game. The first and the most crucial role of this token is the ability to exchange (buy) them for individual or packages of DNX eggs. By doing so, the ecosystem of DinoX will have an essential in-n-out flow of DNXC. It wouldn’t be necessary to have it. Still, as the ecosystem of this project is not only about the DNXs as collectable and tradeable assets, and its primary goal is to provide a fully developed casual

but complex game, this token will be a beneficial inclusion for DinoX. The in-game marketplace will be handled by this token (only the DNX dinos are potentially going to be sold on open-sea or other NFT markets as it's a standard ERC721 token), so the user will be able to sell or buy other essential items for usage. It will mostly be the DNXI token described later in this T&C. DNXC will be used for staking and governing. We want to give the community an option to vote on or choose different aspects of the project, and we want to reward them for participating in the ecosystem. Last but not least, basic usage of this token will be a reward for playing the game. (Winning tournaments, winning battles, finding treasures, etc.)

- 1.1.19. "DNXI" shall mean a digital token, a tradable token, allowing support in the project and voting on its future. Generated with a standard Token Generation Event will create the necessary resources to realise the project's development and ensure the ecosystem can grow in a free market. Dinox will also allow staking at this time so that holders of the token can begin creating value in their ecosystem. Staking will also increase and draw chances for Dinox (NFT) Token drops.
- 1.1.20. "Ecosystem Operators" shall mean Freight Games Limited, a Company duly incorporated and validly existing under the British Virgin Island law, whose registered office is Intershore Chambers, Road Town, Tortola, British Virgin Islands, represented by the director Mr. Jesse Warren August, and registered under BVI company number 2128792.

2. Dinox

- 2.1. Dinox is a game developed by the Ecosystem Operator (Freight Games Limited, a

Company duly incorporated and validly existing under the British Virgin Island law, whose registered office is Intershore Chambers, Road Town, Tortola, British Virgin Islands, represented by the director Mr. Jesse Warren August, and registered under BVI company number 2128792).

- 2.2. The Company is considered a blockchain-based gaming service provider providing a gaming Ecosystem that functions fully legally and compliant within its established jurisdiction.
- 2.3. The Ecosystem Operator is a game developer and intellectual property development platform behind the creation of Dinox.
- 2.4. In the game, players enjoy fun games, collect and earn 3D NFTs dinosaur eggs called DNX, grow them and turn them into dinosaurs.
- 2.5. DinoX was born out of the desire to create a fun, new way to interact with NFT collectables while also trying to satisfy our inner child's dream of owning our very own dinosaurs. In doing so, we created a world of collectable and tradeable NFT dinosaurs living and breeding on the Ethereum blockchain. And that's not all. The DinoX universe is a fully interactive ecosystem with exciting games where users can enjoy their dinos and potentially earn some rewards along the way.
- 2.6. DNX Tokens. Our dinos are even based on the lifelike dinosaur genera. We've got all of your favourites - think Triceratops, Velociraptor, Stegosaurus, Brontosaurus. Tyrannosaurus - along with tons of really awesome ones you will be amazed by when you see them! We've created a procedural generator to help create the uniqueness of each dino. We eventually want to include the full spectrum of known dinosaur genera and make some new, never before seen dinos unique to DinoX.
- 2.7. Players can choose
 - 2.7.1. The colour patterns and physical features such as actual size, scales, feathers, spikes, etc., are described in the backstory of each dino NFT and are accurately depicted just as they would be if the real dinosaurs were still roaming the Earth today. Starting as dino eggs, the owner can choose to hatch the egg and discover what awesome dino is inside or keep the egg unhatched. Unhatched eggs may be desirable to collectors since it's a mystery which dino is inside. When sold to a new owner, they get the experience of solving that mystery themselves. Both hatched, and unhatched dinos can be traded, sold, or kept by their prospective owners.
- 2.8. DinoX ecosystem could be separated into smaller functional pieces, all of them

working together by utilization of 3 main assets fully deployed on the Ethereum main blockchain (and on sidechains).

2.8.1. DNX - Dinosaur NFTs (ERC 721)

2.8.2. DNXC - Currency used for trading DNX eggs, staking, governing, playing the game and fully liquidable on marketplaces (ERC 20)

2.8.3. DNXL - Tokens existing on ETH sidechains (Layer 2) - these tokens represent all the utility functions to be used within the games.

2.8.3.1. For example:

2.8.3.1.1. Character equipment, Dino upgrades, Island park utilities, etc.

- 2.9. This Website and its related services are provided “as is” and “as available” without warranty of any kind. Using this website, you accept sole responsibility for any and all transactions involving Dinox digital collectables.
- 2.10. The above-mentioned digital ecosystem shall comprise Dinox websites (whose domain names include but are not limited to <https://www.dinox.io>), mobile applications, applets, and other developed applications to offer Dinox Services, and includes independently operated platforms, websites, and projects within the ecosystem.
- 2.11. Dinox is operated by the Ecosystem Operator. From a legal perspective, if Dinox or the Ecosystem are referred to, the subject of any duties or obligations remains the Ecosystem Operators (i.e., the legal entities operating the Ecosystem). The Ecosystem itself is not a legal subject and cannot assume responsibilities or obligations.
- 2.12. The Ecosystem Operator shall correspond to the legal entities responsible for the provision of the Services. Given the high level of uncertainty over the legal framework concerning crypto-assets and for the purpose of mitigating the regulatory risks associated with such uncertainty, The Ecosystem Operator may change. In this case, the new legal entities shall be considered as Ecosystem Operators. They shall meet their obligations under these T&C.. Any change in the Ecosystem Operator legal structure shall not affect the rights and obligations of the Visitors and the Users.
- 2.13. In case of a dispute, the plaintiff shall determine the counterparties depending on the relevant services and the particular actions or omissions that affect the rights or interests of the plaintiff.

3. Entire Agreement & Severability

These Terms, the Privacy Policy, the Cookies Policy (which sets out information about the cookies on our site), and the Disclaimer subject to any amendments or modifications made by the Ecosystem Operator from time to time, shall constitute the entire agreement between you and The Ecosystem Operator with respect to the use of the Website. Suppose any provision of these Terms is found to be invalid by a court of competent jurisdiction. In that case, that provision only will be limited to the minimum extent necessary, and the remaining provisions will remain in full force and effect.
